

Tagging Gun Use Guidelines

If you use a tagging gun please follow these guidelines to ensure that we are able to accept your items for sale at our event. Thanks!

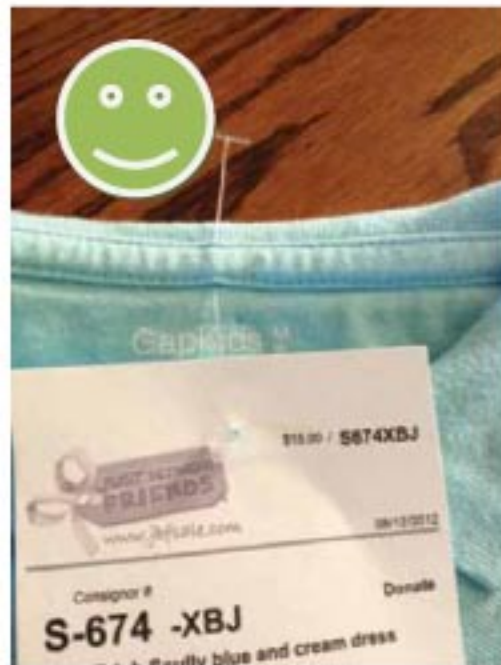

← **YES!**

Place the tag gun needle through a raised lip **INSIDE** the fabric/edging, near the neck area.

NO!! →

Don't go all the way through the back of fabric to avoid making a hole in the garment. If you go straight through the fabric you **WILL** damage the item.

← **YES!**

This is how you should safely tag through an inside seam. Make sure you carefully go through the 'lip' area on the inside of the shirt and not all the way through the shirt.

NO!! →

Do **NOT** place the tag through an outside seam as it is easy to miss the seam and damage the fabric.

← **YES!**

Tag through a neck tag when possible. This is the ideal place to tag.

NO!! →

Do **NOT** tag an item through any tag towards the bottom of the shirt. Shoppers won't be able to locate the price easily.
